Welcome

As Conference Chair I'm honored to welcome all participants to the **5th Global Conference on Cyber Security and Cloud Engineering (GCCSCE)** held on July 28-30, 2023, in beautiful Vancouver, BC, Canada

This conference will be an excellent opportunity to meet and network with delegates from around the world in areas of management, marketing, international business, human resource management, accounting, finance, entrepreneurship, digital marketing, informational technology, Nursing, healthcare, business, and economics. Participants should benefit from conference presentations exploring cutting-edge reviews and investigations in basic and applied research.

Attending this conference also gives you an opportunity to explore Vancouver and enjoy its scenic views, tropical climate, and friendly people. Vancouver enjoys a global reputation as one of the world's top cities for quality of life and recreation. Vancouver attracts many international conferences and events, including the 2010 Winter Olympics and Paralympics.

Thank you for considering attending the **5th Global Conference on Cyber Security and Cloud Engineering (GCCSCE) 2023**. A wide scope of participation will enrich our conference and help us all add significant value and experience to our shared research objectives.

Dr. Afzalur Rahman
CEO & Conference Chair

Conference Committee

Keynote Speech

Success Adewole

Nigerian entrepreneur

Success Adewole is a Nigerian entrepreneur and a student of International Supply Chain Management at Douglas College in British Columbia, Canada. He completed his Bachelor's degree in Oil and Gas Engineering at All Nations University in Koforidua, Ghana. As part of his final year project, he conducted a research project on the comparative analysis of fuels, specifically petrol and diesel, from Total II filling station and Mobile I filling station in Koforidua Ghana. Success Adewole is the Managing Director of Success Call Limited, a study abroad agency that offers assistance to international prospects seeking to further their studies in Ghana, the Netherlands, the UK, and Canada. Additionally, he serves as the Nigerian representative for the Global Conference Alliance, where he facilitates the organization's registrations and activities and awareness campaigns in Nigeria. In addition to his involvement in the study abroad industry, Success has also established other successful businesses such as "The WOW Effect Artistry," a digital media and art company. In 2018, his company was commissioned by the Office of the Security Adviser to the President of Nigeria to create an art piece depicting Peace and Democracy in relation to the 2019 general elections in Nigeria. Success Adewole's diverse entrepreneurial ventures highlight his passion for education, the arts, and making a positive impact in society. Alongside his studies in International Supply Chain Management, he actively contributes to the growth and presence of the Global Conference Alliance in Nigeria, while also assisting students in their pursuit of educational opportunities through Success Call Limited. Through his endeavors, Success aims to leave a lasting impression and contribute to the development of his community and beyond.

Authors' Presentation Schedule

Saturday, July 29, 2023

Technical Session

02:15 pm to 02:55 pm

Name and Affiliation	Title and Abstract
<p>Wade Ghribi (Author) <i>King Khalid University</i></p>	<p>Locating hot spot states of cyber crime against children and initiating cyber security measures</p> <p>In digitally connected world, children are the maximum dynamic users of internet and web-based services. Cyber crime is one of the major drawbacks of web. Children are young people and vulnerable to abuse and exploitation of cyber-predators and perpetrators. Cyber criminals involve in online child abuse, child exploitation, possession of child pornography, cyber bullying, exposure to harmful web content, and many more. Cyber crime cases against children data released by the National Crime Records Bureau (NCRB) of India are utilized to analyze and find the hot spot states using the k-means cluster algorithm. The analysis and findings of the study can help government to initiate additional cyber security measures and develop effective strategic plans to control cyber crimes against children.</p>
