Welcome

As Conference Chair I'm honored to welcome all participants to the **Conference organized by Global Conference Alliance Inc.** held on March 01-03, 2024, in beautiful Vancouver, Canada.

This conference will be an excellent opportunity to meet and network with delegates from around the world in areas of management, marketing, international business, human resource management, accounting, finance, entrepreneurship, digital marketing, informational technology, Nursing, healthcare, HRM Leadership, Social Science, Engineering, business, and economics. Participants should benefit from conference presentations exploring cutting-edge reviews and investigations in basic and applied research.

Attending this conference also gives you an opportunity to explore Vancouver and enjoy its scenic views, tropical climate, and friendly people. Vancouver enjoys a global reputation as one of the world's top cities for quality of life and recreation. Vancouver attracts many international conferences and events, including the 2010 Winter Olympics and Paralympics.

Thank you for considering attending the Conference. A wide scope of participation will enrich our conference and help us all add significant value and experience to our shared research objectives.

Dr. Afzalur Rahman
CEO & Conference Chair
Global Conference Alliance Inc.
Proudly Canadian, Truly Global

Global Conference Alliance Inc.

300-9850 King George Blvd, Surrey, BC V3T 0P9, Canada
Cell: +1 672-971-2088 (Hotline & Whatsapp) | +1 236 477 8411 (Customer Service)
Email: contact@globalconference.ca | Visit: www.globalconference.ca

Conference Venue

UBC ROBSON SQUARE

ROOM: C215

Classroom Level, 800 Robson Street, Vancouver, British Columbia
Canada V6Z 3B7

Directions:

Global Conference Alliance Inc.

300-9850 King George Blvd, Surrey, BC V3T 0P9, Canada

Cell: +1 672-971-2088 (Hotline & Whatsapp) | +1 236 477 8411 (Customer Service)

Email: contact@globalconference.ca | Visit: www.globalconference.ca

Public Transit:

UBC Robson Square is a short walk from the Burrard, Granville, and City Centre SkyTrain stations. Use the TransLink website to plan your trip via transit from any location in the Lower Mainland: <https://www.translink.ca/>

Driving & Parking

To access the West Park lot for 800 Robson Street (Lot 189), head south on Howe Street to the corner at Nelson Street. The parking lot entrance will be on your right, just before Nelson. Note that Howe is a one-way street. Once you have entered the parking lot, follow the directional signs to UBC Robson Square. Please consult the West Park website for current pricing. Or Call Westpark at: 604-669-7275 [PARK]

Accessibility

UBC Robson offers elevator access via our entrance on Hornby Street at Robson Street.

Global Conference Alliance Inc.

300-9850 King George Blvd, Surrey, BC V3T 0P9, Canada

Cell: +1 672-971-2088 (Hotline & Whatsapp) | +1 236 477 8411 (Customer Service)

Email: contact@globalconference.ca | Visit: www.globalconference.ca

Conference Time Schedule

March 01-03, 2024 – Vancouver, Canada

- **Friday, March 01, 2024** – Arrival & Reception of the participants to Vancouver, Canada
- **Saturday, March 02, 2024 (Conference Day)** – Registration, opening speech, keynote speech, and technical sessions:

Registration will start at 1:00 PM and Gate will be closed at 1:30 PM. Please be present within this time

Activity - Saturday, March 02, 2024 (Conference Day)	Time
Registration, Opening Remarks & Lunch	01:00 PM to 01:30 PM
Keynote Speaker - Nursing and Healthcare Management (GCNHM)	01:35 PM - 01:45 PM
Keynote Speaker - Medical and Health Science (GCMHS)	01:50 PM - 02:00 PM
Keynote Speaker - Public Health and Epidemiology (GCPHE)	02:05 PM - 02:15 PM
Keynote Speaker - Environmental and Biological Science (GCEBS)	02:20 PM - 02:30 PM
Technical Session/ Paper Presentation - GCNHM	02:35 PM - 02:45 PM
Technical Session/ Paper Presentation - GCMHS	02:50 PM - 03:00 PM
Technical Session/ Paper Presentation - GCPHE	03:05 PM - 03:10 PM
Technical Session/ Paper Presentation - GCEBS	03:15 PM - 03:25 PM
Coffee Break, Certificate Giving and Photo session	03:30 PM - 03:45 PM
Closing Ceremony and Photo Session	03:50 PM - 4:00 PM

- **Sunday, March 03, 2024** – City visit (optional to the participants)

Global Conference Alliance Inc.

300-9850 King George Blvd, Surrey, BC V3T 0P9, Canada

Cell: +1 672-971-2088 (Hotline & Whatsapp) | +1 236 477 8411 (Customer Service)

Email: contact@globalconference.ca | Visit: www.globalconference.ca

Conference Committee

Keynote Speech

Victor Herrera Tanaka, MD

Clinical Research Coordinator, Dr. Chih-ho Hong Medical Inc.

Experienced cardiologist and clinical scientist with a strong background in clinical research and pharmaceutical drug development. Renowned for mentoring medical residents and students, I prioritize education and training for excellence. I bring a positive, empathetic attitude, adept at working across organizational levels for continuous skill enhancement. Skilled in-patient evaluation and specialized procedures in various settings, I have a profound grasp of complex health issues. I am seeking to utilize my expertise and innovative spirit to develop new treatments and enhance patient care.

Global Conference Alliance Inc.

Committee Members

- **Dr. Afzalur Rahman**, Douglas College, Canada Conference Chair
- **Dr. Michael Henry**, Thompson Rivers University, Canada; Dean, School of Business & Economics – Adviser
- **Masum Billah Bhuiyan**, Founder of Giant Marketers
IT Entrepreneur || Public Speaker || Business Coach || Digital Marketing Expert
- **Mr. John O’Fee**, QC, Thompson Rivers University, Canada - Business Law and Human Resource Management
- **Dr. Erika Skita**, Instructor, Granville College in Vancouver, Canada
- **Dr. Dushyant Gosai**, Colorado State University-Global Campus, United States - Accounting
- **Mr. Simon Parker**, Douglas College, Canada - Marketing and International Business
- **Dr. Ahmed Hoque**, Vancouver Island University, Canada - Economics and Banking
- **Dr. Emrul Hasan**, The University of British Columbia, Canada -Finance
- **Dr. Murat Eroglu**, Faculty Member, Adelphi University, USA
- **Ms. Marisa McGillivray**, Economist at Statistics Canada Consumer Prices Division
- **Mr. Quazi M. Ahmed**, IFC/World Bank Group Certified Master Trainer
- **Mrs. Yasmin Jahir**, Divisional Chair, Electrical and Computer Engineering Director of Operations, USA

Instructions for Oral Presentation

Saturday, March 02, 2024

Devices provided by the conference organizer:

- ❖ Laptop (with MS-Office and Adobe Reader)
- ❖ Projector and Screen

Materials provided by the presenters:

- ❖ PowerPoint or PDF files (files should be copied to the conference laptop at the beginning of each session)

Duration of each presentation:

- ❖ Regular oral presentation – 10 minutes including Q&A
- ❖ Keynote speech – 20 minutes

Instructions for Publication

All accepted papers in the Conference will be published in the online conference proceedings:

Title: Conference Abstract March 01-03, 2024, Vancouver, Canada.

ISBN : 978-1-998259-20-5

Format: Electronic book

Authors' Presentation Schedule

Saturday, March 02, 2024
Technical Session/ Paper Presentation - GCNHM
2:35 PM - 2:45 PM

Name and Affiliation	Title & Abstract
<p>Addae Ruth (Author) <i>Jamesbert Hospital</i></p>	<p>Psychiatric and Mental Health Nursing in Africa - A Case Study in Ghana.</p> <p>Introduction:</p> <p>This study delves into the landscape of psychiatric and mental health nursing in Africa, with a specific focus on Ghana. Mental health remains a critical aspect of public health, and understanding the challenges and opportunities within the context of African nations is essential. The cultural, social, and economic nuances in Ghana provide a unique backdrop to explore the role of psychiatric and mental health nursing in promoting holistic well-being.</p> <p>Keywords: Psychiatric Nursing, Mental Health Nursing, Africa, Ghana, Case Study, Cultural Competence, Stigma, Community-Based Interventions, Mental Health Literacy, Healthcare Resources, Holistic Well-being.</p>

Name and Affiliation	Title & Abstract
<p>Vincent Opoku (Author) <i>Sunyani Regional Hospital</i></p>	<p>Evidence-Based Nursing - A nursing informatic approach - a case study of Ghana and Sub-Saharan Africa.</p> <p>Abstract:</p> <p>This paper explores the implementation of evidence-based nursing practices in Ghana and Sub-Saharan Africa through a nursing informatics approach. The study investigates the utilization of information and communication technologies (ICTs) in promoting evidence-based nursing, with a focus on enhancing healthcare outcomes and advancing the nursing profession. The case study analyzes the current state of evidence-based nursing in the region, identifies challenges, and proposes strategies to leverage nursing informatics for improved patient care. The findings aim to contribute to the global discourse on healthcare technology adoption and its impact on nursing practices, particularly in resource-constrained settings.</p> <p>Keywords: Evidence-Based Nursing, Nursing Informatics, Healthcare Technology, Sub-Saharan Africa, Ghana, Information and Communication Technologies (ICTs), Patient Care, Nursing Practices.</p>

Name and Affiliation	Title & Abstract
<p>Alhage Drammeh (Author) <i>Ministry of health The Gambia</i></p>	<p>Causes of Jaundice and Skin Rashes among Children in Selected Rural Communities in The Gambia, West Africa.</p> <p>Abstract: The research is on the occurrence of certain diseases among children in rural and far flung parts of the Gambia, and the extent to which they are caused by lack of access to clean water. The paper explains the purpose of the research, which is majorly to improve the health condition of children more especially those living in the rural communities. The paper also gives a brief overview of the socio-economic situation of The Gambia, emphasizing its status as a Least Developed Country (LDC), and majority of its population living below the poverty line, with women and children hardest hit. The research used as case studies, two rural communities in the Gambia -Basse Dampha Kunda Village and Foni Besse. Data was collected through oral interviews and medical tests conducted among people in both villages, with emphasis on children. The demographic detail of those tested is tabulated for a clearer understanding. The results were compared, revealing that skin rashes, hepatitis and certain other diseases are more prevalent in communities lacking access to safe drinking water. These results were also presented in a tabular form. The study established how some policy failures and neglect on the part of the Government of The Gambia is imperiling the health of many rural dwellers in the country, the most glaring being that the research team was unable to test water samples collected from the two communities, as there are no laboratory reagents for testing water anywhere in The Gambia. Many rural communities lack basic amenities especially clean and potable water, as well as health facilities. The study findings also highlighted the need for healthcare providers and medical NGOs to voice the plight of rural dwellers and collaborate with government to set up health facilities in rural areas of The Gambia.</p> <p>Keywords: security, electronic commerce, production, delivery, transfer, receipt</p>

<p>Wendy Adjoa Yakah (Author) <i>Tamale Teaching Hospital</i></p>	<p>Navigating the Hurdles: a Case Study on Paediatric Nursing Challenges and Approaches in Ghana.</p> <p>Background:</p> <p>The fundamental purpose of the study orbits around unraveling the multifaceted challenges and developing proficient strategies pertinent to pediatric nursing in a developing nation, with a specific lens focused on Ghana. The vitality of proficient pediatric care is irrefutable, especially in developing nations where healthcare resources may be scarce or unequally distributed. Thus, an examination into the actualities and potential avenues for enhancement within this nursing subset becomes pivotal. The analysis further aims to illuminate the variances between theoretical knowledge and on-ground practicalities, thereby paving a pathway toward not only understanding the hurdles encountered by pediatric nurses but also propelling policy and procedural changes that can substantially ameliorate child healthcare in Ghana.</p> <p>Keywords: Pediatric Nursing, Developing Country, Resource Allocation, Healthcare Disparities, Ghana, Rural Healthcare, Training and Development, Child Health Outcomes.</p>

Name and Affiliation	Title & Abstract
<p>Yaw Arkoh-Badu Essuman (Author)</p> <p><i>Korle Bu Teaching Hospital, Ministry of Health, Government of Ghana</i></p> <p>Christian Obirikorang, PhD (Co-Author)</p> <p><i>Kwame Nkrumah University of Science and Technology (KNUST)</i></p>	<p>Association of rs5186 and rs11091046 variations of the angiotensin II receptor gene with essential hypertension; a case-control study in a Ghanaian population.</p> <p>Abstract: Genetic variation of Angiotensin II Receptor type I (AGTR1) and type II (AGTR2) genes have been found in individuals with essential hypertension (EH). There is a paucity of data on genetic factors contributing to EH in the Ghanaian population. The present study investigated the presence of genetic variants of AGTR1 (rs5186) and AGTR2 (rs11091046) genes and their association with EH. We analyzed the rs5186 and rs11091046 variations in 100 patients with clinically diagnosed EH and 100 healthy controls. Questionnaires were used to acquire information on participants' sociodemographic hemodynamic and anthropometric parameters. Logistic regression models were used to assess the associations between genetic variations and EH. The cases had higher minor allele frequencies of rs5186 (25% vs. 6%, $p < 0.001$) and rs11091046 (62.1% vs 41.5%, $p = 0.004$) than controls. The recessive genotype of rs11091046 was found in 61% of patients and 13% of controls. Control and EH participants had significantly different mean body mass index and systolic and diastolic blood pressures among the different genotypes ($p < 0.05$). In an adjusted regression analysis, only rs11091046 was significantly associated with EH [aOR= 9.57 (95%CI: 3.77-24.30)]. The study highlights that genotypes and alleles of rs5186 and rs11091046 exist among essential hypertensives in the Ghanaian population and variants of the rs11091046 gene are determinants of predisposing individuals to EH.</p> <p>Keywords: Angiotensin II, Angiotensin Receptor, Essential hypertension, allelic variation, rs5186 and rs11091046</p>

Technical Session/ Paper Presentation - GCEBS
3:15 PM- 3:25 PM

Name and Affiliation	Title & Abstract
<p>Farzaneh Tayebi (Author) <i>Yasouj University</i></p> <p>Abolfazl Heydari (Co-Author)</p> <p>Mahnaz Farahi (Co-Author)</p> <p>Hassan Sheibani (Co-Author)</p>	<p>Enhanced Removal of Anionic Dye Compounds from Aqueous Solutions using Beta-Cyclodextrin Polymer Crosslinked with Epichlorohydrin.</p> <p>Abstract:</p> <p>Achieving clean water is one of the increasing needs of people, which faces alarming challenges, and new approaches are necessary to remove organic molecules such as dyes from water. In this work, β-cyclodextrin polymerized by epichlorohydrin as a crosslinking agent (β-CDP) was prepared to remove methyl orange from aqueous solutions. Fourier-transform infrared spectroscopy and Scanning Electron Microscope verified the successful preparation of β-CDP hydrogels and their morphology surface. Differential scanning calorimetry and Thermogravimetric analyses were utilized to examine their thermal properties. The swelling properties of the β-CDP hydrogel were investigated in water and simulated body media (pH: 3, 7, and 10). According to the results, β-CDP hydrogel in a neutral medium has the highest water absorption. Finally, the capability of the prepared hydrogel for methyl orange removal was investigated, and the absorbent amount and absorption time were optimized. The results showed that the maximum methyl orange absorption is obtained when 5 mg β-CDP hydrogel and a reaction time of 300 minutes. examined. The laboratory findings are more compatible with the Langmuir equation than the Freundlich isotherm diagram.</p> <p>Keywords: Methyl orange removal, β-Cyclodextrin, hydrogel, Epichlorohydrin.</p>

Name and Affiliation	Title & Abstract
<p>Ajaja Godwin Stanley (Author)</p> <p><i>Department of Microbiology/rivers State University</i></p>	<p>Examination of Oral Cavity for Pathogenic Bacteria Among University Students in Port Harcourt Rivers State.</p> <p>Abstract: The study examined of oral cavity for pathogenic bacteria among university students in Port Harcourt Rivers State. Oral swab specimen was collected from the oral cavity (mouth) of each participant by inserting a sterile oral swab stick 1-2 inches into the mouth to gently swab the walls of the oral cavity including the oral mucosa, the teeth, area between the cheek and gum, as well as the tongue for one to two minutes. The swab stick was removed aseptically and corked immediately. All samples were transported to the laboratory inside a sealed plastic bag as soon as the collection was done. Samples were processed on the same day of collection. Results shows that the highest numbers of bacterial colonies were observed in the fifth sample ($6.2 \pm 0.64 \times 10^3$) followed by Fourth ($3.7 \pm 0.09 \times 10^4$) and first ($2.9 \pm 0.45 \times 10^6$) samples. Third and second samples recorded ($2.7 \pm 0.77 \times 10^4$) and ($1.8 \pm 0.12 \times 10^5$) respectively. Similarly, five (5) bacteria genera isolated from the five (5) oral samples collected from students; these bacteria isolate was identified and confirmed as Streptococcus spp, Staphylococcus sp., Enterobacter sp., Pseudomonas aeruginosa and Klebsiella Pneumonia. The highest prevalence of typhoid was recorded in 25-29 years, followed by 20-24, 15-19, 30-34, 2-14 and 35-above respectively. Lastly, the five samples were resistant to Cpx 10mcg, sample two showed intermediate zone of inhibition while the rest samples were resistant to PN 30mcg. Sample one was susceptible to GN 10mcg while sample 2, 3, 4 and 5 showed intermediate zone of inhibition. Sample one, two and four were susceptible to SXT 30mcg while sample three and five showed intermediate zone of inhibition. It is concluded that the bacteria recovered from oral cavity of students in Ignatius were Streptococcus spp, Staphylococcus sp., Enterobacter sp., Pseudomonas aeruginosa and Klebsiella Pneumonia. It was recommended amongst others that proper sensitization on oral health should be done for students.</p> <p>Keywords: Oral cavity, Pathogenic bacteria, University students, Rivers State.</p>
